Aitor Aznar Álvarez

Software developer (+12 years exp)

About me

I would describe myself as an enthusiastic person for my work. Despite a hard work day in the office, I'm willing to spend even more time learning and improving my abilities. As a self-motivated engineer, I usually take online courses and develop applications / webs on my own, I also like to attend tech meetings.

My co-workers say about me I'm a person involved in what it does and who likes to give the best of himself. I don't mind taking risks and make a mistake if with this I can learn about it to improve myself.
